## Otis Historical Archives

### OHA 74 Army Medical Museum Photographs

**Date of Records:** 1897-ca. 1915

**Size:** 14 cubic feet, 14 boxes

**Finding Aid:** Revised by Eric W. Boyle (2014)

**Access and Use:** The Otis Historical Archives is committed to providing open access to its collections as far as possible within the limits of privacy and confidentiality. Access to this collection is at the discretion of the Otis Historical Archives and material contained within the records may be subject to review before access is granted.

**Series/Scope and Content Note:** This collection represents a photograph series begun by the Museum during the Spanish-American War. It consists of glass plate negatives which have not all been printed. Most images show medical activities and equipment (including hospital ships and trains) during the war; later images are bacteriology photomicrographs and illustrations for medical manuals showing Hospital Corps activities. Although not a complete listing, the following inventory lists the AMM number attributed to the numbered image, along with a descriptive title, related key words, and (in some cases) NMHM accession numbers. Box 001 also includes information on which glass plate negatives have been used to make prints.

#### Box 001:

<u>AMM #</u>	<u>Title</u>
0005	CUBAN HOSPITAL AT SIBONEY, CUBA. 8 JULY 1898.
0011	VIEW OF RELIEF AT SIBONEY. JULY 10, 1898.
0026	VIEW OF RELIEF FROM BEACH AT SIBONEY. JULY 10, 1898.
0030	see AMM 2365
0031	TAKING X-RAY PICTURE ON THE RELIEF. SUBJECT IS COLONEL ESKRIDGE.
0031	see AMM 2363
0031A	see AMM 2359.

0034 see AMM 2362
